THE FINNISH FILM FOUNDATION SUPPORT GUIDE

THE FINNISH FILM FOUNDATION

The Finnish Film Foundation is an independent foundation under the guidance of the Ministry of Education and Culture. The aim of the Film Foundation is to promote high-quality, diverse and innovative film production in Finland. The Foundation grants support for the professional production, screening and distribution of films in various distribution channels. The Foundation is also responsible for the export of Finnish films, promoting the internationalisation of Finnish films and filmmakers and distributing support for the international promotion of films. The Foundation grants support for nationally significant international film festivals in Finland.

The Finnish Film Foundation receives its funds from Veikkaus and the Finnish gaming system from the monies allocated to the government’s budget for the promotion of film. The Film Foundation's support is discretionary and falls under the Act of Discretionary Government Transfers and act on the government promotion of film culture. The support is granted based on applications.

The aims and specific criteria of the support vary across support types. They have been described in support-specific grant announcements and in this guide. The grant announcement defines for whom the support is intended and who may apply. The Film Foundation’s support is granted for professional operations.

ACT ON THE GOVERNMENT’S SUPPORT FOR THE PROMOTION OF FILM CULTURE (1174/2018)

The aim of the act is to promote
1) diverse and professional Finnish film production
2) the broad supply and distribution of films
3) the internationalisation of Finnish films and filmmakers
4) film culture and its development.

Participation, pluralism, cultural diversity and artistic freedom form the basis for reaching this aim.

(Act on the government’s support for the promotion of film culture, section 2)

The Foundation’s grants are based on the act on the government’s support for the promotion of film culture (1174/2018). The grants apply the Act on Discretionary Government Transfers (688/2001). The Foundation follows the Administrative Procedure Act, the Act on the Openness of Government Activities (621/1999), the Language Act (423/2004), the Sámi Language Act (1086/2003), the Archives Act (831/1994), the Act on Electronic Services and Communication in the Public Sector (13/2003) and the Privacy Protection Act (9/2018).

ACCESS TO DOCUMENTS

According to the Act on the Openness of Government Activities (621/1999), a document submitted to the Finnish Film Foundation is public. Documents may also be designated confidential under the law or access to them may be discretionary. Confidential official documents include documents that contain information about private business or trade secrets.

BLOCK EXEMPTION REGULATION

The support granted by the Foundation is government aid that falls under the EU’s Treaty, Article 107, and the decision by the EU Commission on 26 November 2008 concerning subsidies for the Finnish film industry (Commission regulation (EU) 651/2014), later block exemption regulation (BER).

Support granted by the Foundation must fulfil conditions listed in the BER’s Articles 1–9 (general regulations) and Article 54 (aid schemes for audiovisual works).
According to the BER, support must be directed to a cultural product and can be granted for the production of audiovisual works, pre-production and distribution. According to section 3 of the act on the promotion of film, support may be granted for the production and distribution of films if the film can be considered an independent work of art, its content is based on cultural values originating in cultural identity and the film involves a significant artistic contribution by creators and performers whose wages and salaries form a significant portion of the production costs.

According to the BER's Article 53 (aid for culture and heritage conservation), the support may be granted for festivals and other similar cultural activities. According to the Article, support may take the form of either operating or investment aid.

According to the BER's general regulations, **the support should not be applied** to cases where the recipient would execute their project with or without the support, government support that has conditions or financing methods that do not follow EU legislation and especially support measures where the recipient is required to operate mainly from or in the country granting the support. However, the requirement that the recipient has a place of business or a subsidiary in the country granting the support is permissible.

An unconditional requirement is that the support cannot be granted to a corporation which is subject to an outstanding recovery order following a previous Commission decision declaring the aid illegal and incompatible with the internal market (BER, Article 1, Section 4 a).

1. THE TERMS AND PRINCIPLES OF PROJECT SUPPORT

The aim of the support

The aim of the international promotion support is to promote the internationalisation of Finnish films and filmmakers, boost the international status of Finnish films and to expand the skill set of film professionals.

(Act on the government’s support for the promotion of film culture, section 2, specific justifications)

To whom?

The Finnish Film Foundation is responsible for the export of films whose main production country is Finland.

Project support for international promotion may be primarily granted for films that have received production support from the Foundation. The support covers completed and soon to be completed feature films, short or serialised drama, documentary, animation or children's films and combinations thereof.

Project support for international promotion may be granted to a production company that has the professional and financial means to market and distribute films or to a corporation registered in Finland that administers a film's international commercial rights or a domestic filmmaker or group of filmmakers.
For what purpose and how much?

The project support for international promotion is meant for the promotion of Finnish film exports.

Project support can be granted also for digitisation of previously released films if there is significant international interest which advances Finnish film culture.

(Act on the government’s support for the promotion of film culture, section 6, specific justifications)

Support may be granted in full (100%) for necessary and justified reasons in order to reach stated objectives. Other funding and self-financing of the project are viewed as an advantage.

Apply for a realistic amount that supports the execution of the strategy. Please view previous support decisions from the Finnish Film Foundation’s support decisions page.

The project’s expenses are approved without regard to VAT. If the grant recipient does not have the right to VAT deductions, the costs may be approved with VAT.

How and when to apply?

Applications are submitted online (https://hakemus.ses.fi) by sending in the application and appendices to the Finnish Film Foundation.

New applicants must register to the online application system. New clients are registered within a week.

The Film Foundation may request further information if it deems it necessary for the decision-making process.

Support cannot be granted if the application is insufficient and the required information is not submitted into the online application system despite requests to do so.
How are the applications evaluated?

Project support for international promotion is discretionary. Granting the support is based on the overall evaluation and comparison of the applications. The following guidelines are used to evaluating the applications:

Evaluation takes into account the project's production and economic feasibility, international significance and the project's ability to produce new practices of internationalisation. In addition, the applicant's artistic, professional and financial means to complete the project and available funds are evaluated. Other funding and self-financing of the project are viewed as an advantage. Other support previously granted by the Film Foundation to the applicant is also taken into account.

How are the decisions made?

The Finnish Film Foundation's Board decides on the project support based on the CEO’s presentation.

The application will be processed in the first board meeting after the application has been submitted. The processing time is approximately 3–8 weeks after the application and all the required appendices have been submitted. The Finnish Film Foundation’s board meets about once a month.

All applicants receive the decision in writing.

The decision is based on the act of government funding for the advancement of cinema (56/2018), the Act on Discretionary Government Transfers (688/2001) and the Administrative Procedure Act (434/2003)

2. PROJECT SUPPORT APPLICATION

The application consists of an online application form and the obligatory appendices uploaded to the system.

Note! The type of appendix should be named to correspond with the appendix so that the online application system refrains from sending an automated message about missing appendices.

Applicant’s appendices

INSTRUCTIONS FOR APPLICANTS – PROJECT SUPPORT APPLICATION:

Applications and the Applicant’s information
The Film Foundation’s online application system has two windows:
1) Applications, where all the information and appendices related to the application are submitted
2) the Applicant’s appendices, where all current production company or corporation documents are submitted

Cost estimate
The cost estimate accounts for the project expenses without VAT. If the grant recipient does not have the right to VAT deductions, the costs may be approved with VAT.

Financial plan
Disclose any other possible funding for the project in the financial plan. Disclose the funding party and the amount.

Other financing agreements
Submit confirmations of other than Film Foundation funding as appendices to the application. The confirmations are submitted as appendices to the application. If funding agreements are confirmed after the application has been submitted, they may be added later as appendices. Notify the processor of any relevant changes.

Audit duty
The Audit Act contains regulations about when a registered corporation is not under the obligation to select an auditor.

A good application and smooth communication
The Film Foundation’s international department processes roughly 300–350 applications per year. It is essential for evaluation and comparison between the applications that the application is clear and carefully prepared.

In a good application, the overall strategy of the project clearly states the project’s aims, execution, schedule and personnel. The project’s cost estimate and financial plan support the project’s strategy and goals. Possible other funding mentioned in the financial plan has been confirmed with financial agreements included in the application’s appendices.

Be clear and relate the essentials in your application. Think especially how the support applied for corresponds to the support’s aims and the evaluation criteria mentioned below. The application must also state why the project is important. Inform the reader of your ability to execute the project.
